To Whom It May Concern

This letter is to confirm that the undersigned, Anne-Louise McWilliam, of 33 Kap Bin Long Middle Lane, Po Lo Che, Sai Kung, New Territories, Hong Kong is authorised to raise funds on behalf of the Australian Cancer Research Foundation (ACRF) in relation to the Great Wall of China Challenge in September 2007.

The Australian Cancer Research Foundation (ACRF) fills a critical need for research funding in Australia. It is dedicated to overcoming cancer's devastating effects. The most important work the ACRF undertakes is the national and exclusive funding of major Australian cancer research initiatives which are at the leading edge in global cancer developments. The Foundation funds facilities for cancer research not provided for by State or Federal medical grants bodies, thus filling a vital gap in cancer research funding in Australia.

In 2006, Australian of the Year, Professor Ian Frazer, discovered a vaccine for cervical cancer – a breakthrough of global significance. The Foundation is delighted to have funded Professor Frazer and his team, at a time during his research when no other funding was available.

Donations to ACRF are tax-deductible.

A handwritten signature in black ink, which appears to read 'David Brettell', is written over a light grey horizontal line.
